CAREER OBJECTIVE

Motivated ECE student with a strong foundation in Core Java, C programming, and embedded systems. Skilled in problem-solving and real-time application development. Seeking opportunities in software or embedded domains.

EDUCATION

Degree	Institution	Location	Year	Mark/Percentage
1. B.E. ECE	VSB College of Engineering Technical Campus	Coimbatore	2023 – 2027	CGPA-8.21 /82%
2. Higher Secondary (12th)	Sri P Mallaiyan Matric Hr Sec School	Coimbatore	2022 – 2023	470/78%
3. Secondary (10th)	Sri P Mallaiyan Matric Hr Sec School	Coimbatore	2020 - 2021	All Pass

PROJECT

1.Leaf Disease Detection System

- Developed a system to detect plant leaf diseases using image processing and classification techniques.
- Implemented real-time analysis to identify infected leaves and assist in early diagnosis.
- Improved accuracy of detection through trained models and image feature extraction. Tech: Python, OpenCV, TensorFlow/Keras

2.Face Mask Detection System

- Developed a real-time mask detection model for automated compliance monitoring using computer vision.
- Tech: Python, OpenCV, TensorFlow/Keras

3.Smart Food Freshness Label System

- Designed a sensor-based system to detect food spoilage and alert users via visual indicators.
- Tech: Arduino/PIC, MQ Sensors, Temp/Humidity Sensors

SKILLS

Programming Languages - Python, C, Java Basics, SQL

Web Development - HTML, CSS

Libraries / Frameworks - OpenCV

Office Tools - Excel, Word, PowerPoint

ACHIEVEMENTS / CERTIFICATIONS

CERTIFICATIONS

- 1.5G Wireless Standard Design – NPTEL, 2025
- 2.Core Java – Coregenic IT Institution, 2023
 - Strengthened Object-Oriented Programming skills with hands-on experience in classes, inheritance, polymorphism, and exception handling. (Grade: A)
- 3.C Programming – Coregenic IT Institution, 2023
 - Learned fundamentals, memory management, and structured programming for problem-solving. (Grade: A)
- 4.ServiceNow -- ServiceNow Virtual Internship, 2026

PATENTS

- 1.AI-Based Energy-Aware Backup Communication System for Army Soldiers
 - Published patent (Application No: 202641036664 A, 2026).
 - Designed an AI-based power management system to enhance communication reliability in extreme environments.
 - Integrated battery monitoring, fault detection, and energy optimization techniques for mission-critical operations.
- 2.AI-Powered Public Complaint Management Platform
 - Published patent (Application No: 202641032442 A, 2026).
 - Developed a digital platform for real-time complaint registration, tracking, and escalation.
 - Implemented secure authentication and automated routing to improve public service efficiency.

INTERNSHIPS

- 1.Learner – Sth Sensors Private Limited (NTC Thermistor) May 2025 – June 2025, Coimbatore
 - Gained practical exposure to NTC thermistor manufacturing and calibration processes.
 - Assisted in hands-on calibration and documented procedures for internal reference.
- 2.Embedded Systems – Emglitz Technologies March 2024 – April 2025, Coimbatore
 - Learned the fundamentals of embedded systems and gained an understanding of how embedded hardware and software work together.
 - Acquired knowledge of Embedded C programming, hardware interfacing, and development board applications through practical training.
- 3.Web Development Intern – Qbatzclay -- Jan 2026
 - Contributed to static web development projects.
 - Demonstrated strong learning ability and professional work ethics.

INVOLVEMENT

Publication /Paper Presentation

- VSU College • IEEE Conference 2025
- “A Novel Intrusion Detection Framework Using Discriminant Analysis and Divergence Metrics for Detecting Anomalies in Networks.”
 - Streamlined cross-functional workflows by integrating new digital project management tools, resulting in enhanced collaboration and accelerated completion of deliverables.

DECLARATION

I here by declare that the above furnished details are correct to the best of my knowledge OLIMAYA K.G
